

Public Notice
Interim Measures Corrective Action Plan For
Public Water System (PWS) Extensions- Corrective Action Area 1
Operable Unit A
North Bennington and Bennington

August 11, 2017

A [Corrective Action Plan](#) (CAP) is being proposed that authorizes an interim corrective action measure for the selected drinking water remedy in Corrective Action Area I-Operable Unit A (CAA 1-OU A), as described in the State of Vermont Consent Order (Consent Order) with Saint-Gobain Performance Plastics (Saint-Gobain). The selected remedy is the extension of public water systems (PWS) to residences and businesses within CAA I where it is technically feasible and cost effective to connect impacted water supply wells with PFOA concentrations at or above 20 ppt and other potentially at-risk wells to the municipal water supply, which is identified as CAA 1 OU A. Approximately 200 homes or businesses will be connected to municipal water lines. More detail about this proposed corrective action can be found in the CAP.

The CAP along with a map showing the proposed water line extensions and the engineering design and plans for the two public water systems (Bennington and the Village of Bennington) are available for review and comment [online](#) and at the Bennington Town Offices, located at 205 South Street, Bennington VT 05201.
